Turbo Death from Turbo Cancers: "We're in Trouble," Says Dr. Ryan Cole

"We're seeing young people get leukemias, and they appear in the emergency room. And they're gone within a week."

THE VIGILANT FOX

Originally Published on Vigilant News

"The statistics are looking not so great," esteemed pathologist Dr. Ryan Cole recently told Greg Hunter on USA Watchdog. "There was an injection that, like you said, 700 million doses were given approximately in the US, according to the CDC. And **this injection was not a vaccine**. And the media, and people's places of work, and whatnot coerced them into thinking that it was. **This was a gene-based injection**."

"If you got one [shot], don't get two. If you got two, don't get three. If you got three, don't get four. If you never got one, please don't get one," Dr. Cole urged. Why? Because the COVID injections can lead to various detrimental health issues, such as autoimmune diseases, inflammation in the hearts of young individuals, neurological damage, and even the exacerbation of conditions like Parkinson's and Alzheimer's disease. "And to bring the monster in the room, **cancer is on the uptick**," lamented Dr. Cole. "We're in trouble."

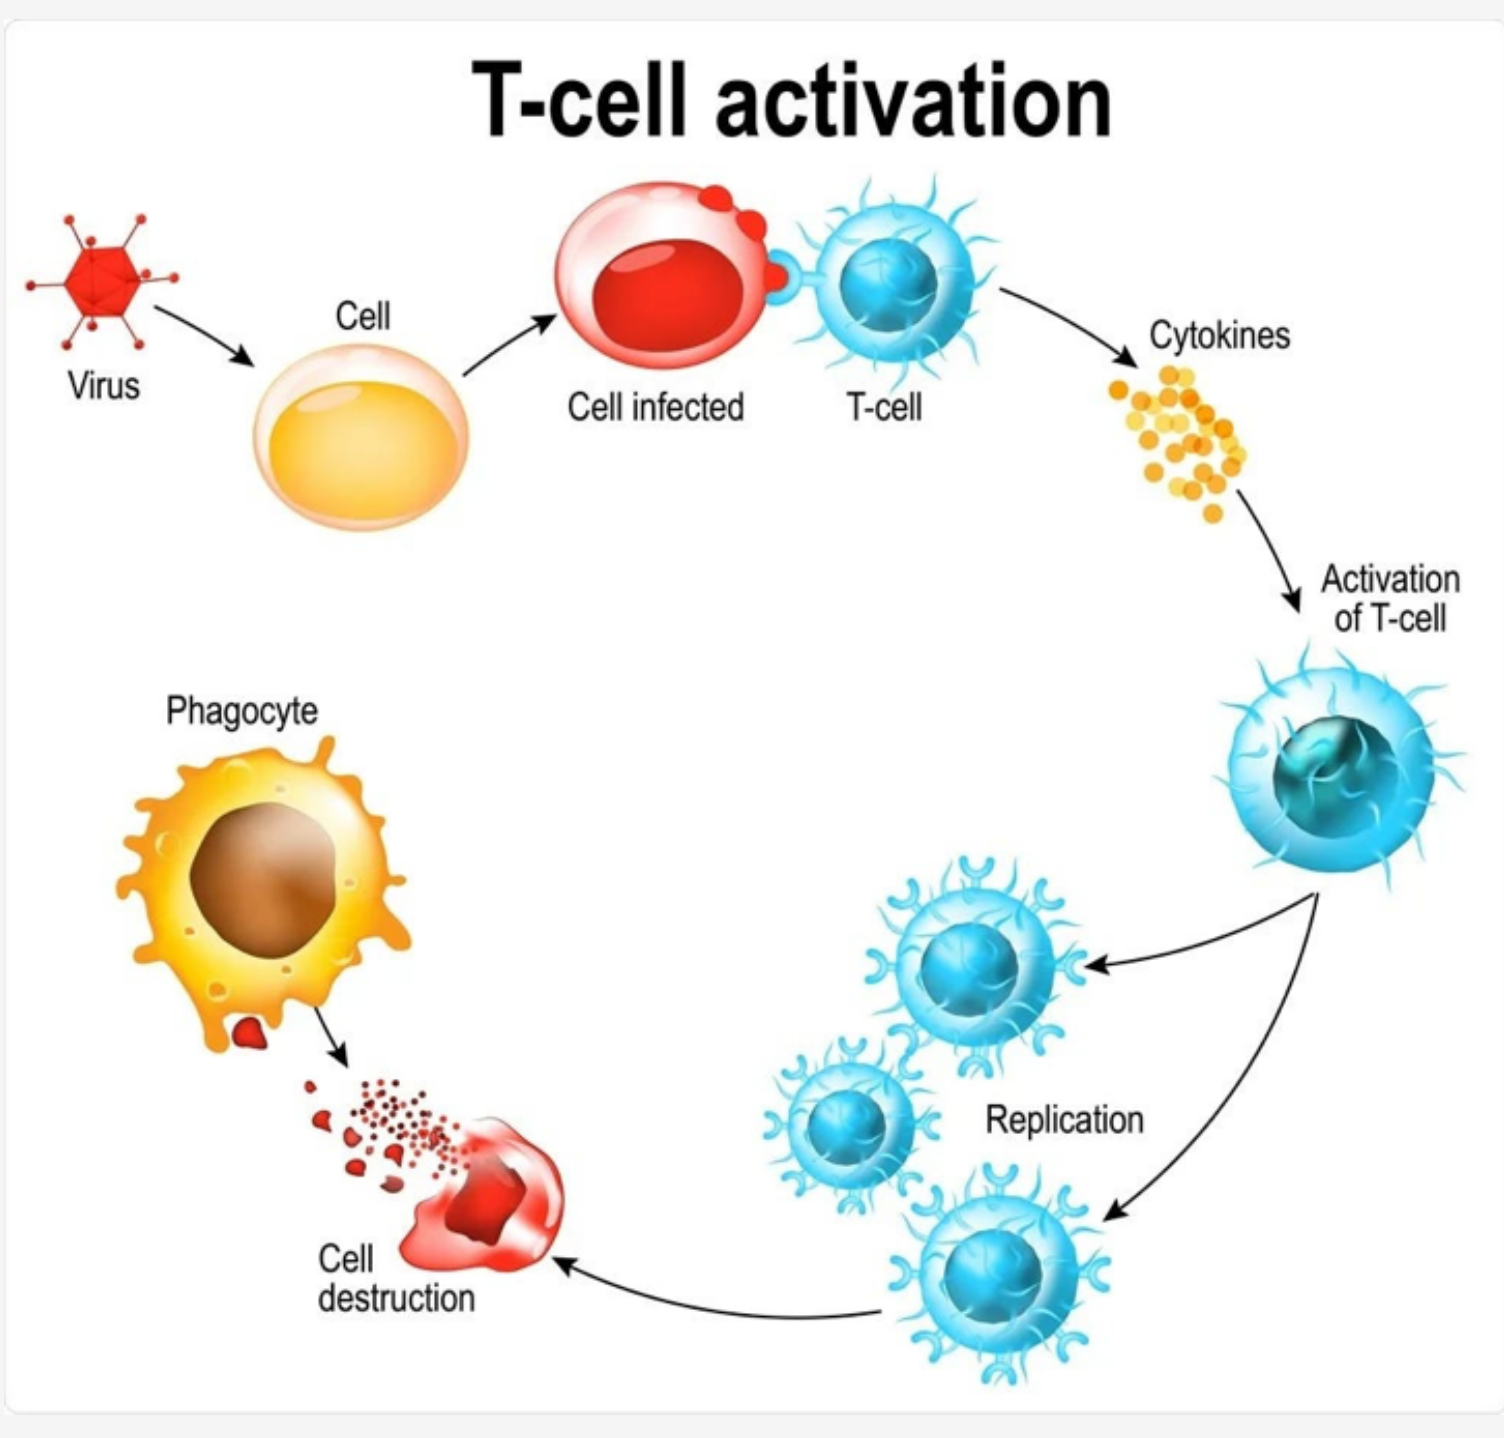
Immune Suppression

Dr. Ryan Cole was one of, if not the first, doctor to publicly sound the alarm on disconcerting cancer patterns after the rollout of the COVID-19 injections.

"I'm seeing these very calm, manageable cancers take off like wildfire, like hydras, like dragons, and they're going everywhere," he warned in 2021.

Why are cancers taking off "like wildfire"? Because "**these shots suppress the immune system**," explained Dr. Cole.

"It [COVID shots] puts your T cells to sleep in a manner that they can't fight. And T cells are basically the marines of your immune system. They're the frontline warriors. And all day long, you and I, sitting here right now, anybody listening, we have about 30 billion T cells circulating around in our body, and they're shaking hands and talking to your cells. 'Hey, are you a friend?' 'Are you a foe?' 'Are you infected?' 'Are you a cancer cell?' 'What do we do with you?' And so, it [T cells] are just knocking on the door, checking all the time with all your cells," Dr. Cole denoted.



T-cell activation. Image: news-medical.net

"Well, these shots, instead of having those [T cells] be hearty, on the front line, healthy soldiers, makes them kind of drunk and go back to the barracks and go to sleep. **And now they can't do that surveillance to fight cancer.**"

"And so, people ask, well, do these shots cause cancer? Well, they cause immune suppression. They cause a disruption and a dysregulation of your immune system that normally is what would fight cancer," he added.

Disconcerting Data

Dr. Cole mentioned that he has traveled the world and has talked to doctors of all specialties, including oncologists, pathologists, family doctors, internists, OBGYNs, et cetera. And what they tell Dr. Cole is, "**I'm seeing cancers in my practice in age groups I've never seen before. And it happened after the rollout of the shots.**"

Dr. Cole also mentioned some alarming data that he has seen from data analyst Edward Dowd and his team at phinancetechonolgies.com.

Edward Dowd

"They [Dowd and his team] went in and looked at the [UK] disability data set. In 2020, there was about a 1 point something percent increase in cancer. In 2021, about 6 or 7%. But in 2022, **there was a 35% expected percent** [increase] **above average**. So, those are the types of data we're seeing that is really concerning," remarked Dr. Cole.

"Turbo Cancers" Are More Aggressive and Not Responding to Conventional Therapies

Dr. Cole explained that cancer typically follows a predictable pattern, where we can observe its progression through various stages. Usually, doctors can anticipate how it will develop and plan appropriate treatments accordingly, with each step in the process having a corresponding therapeutic approach. But "turbo cancers" are not progressing that way.

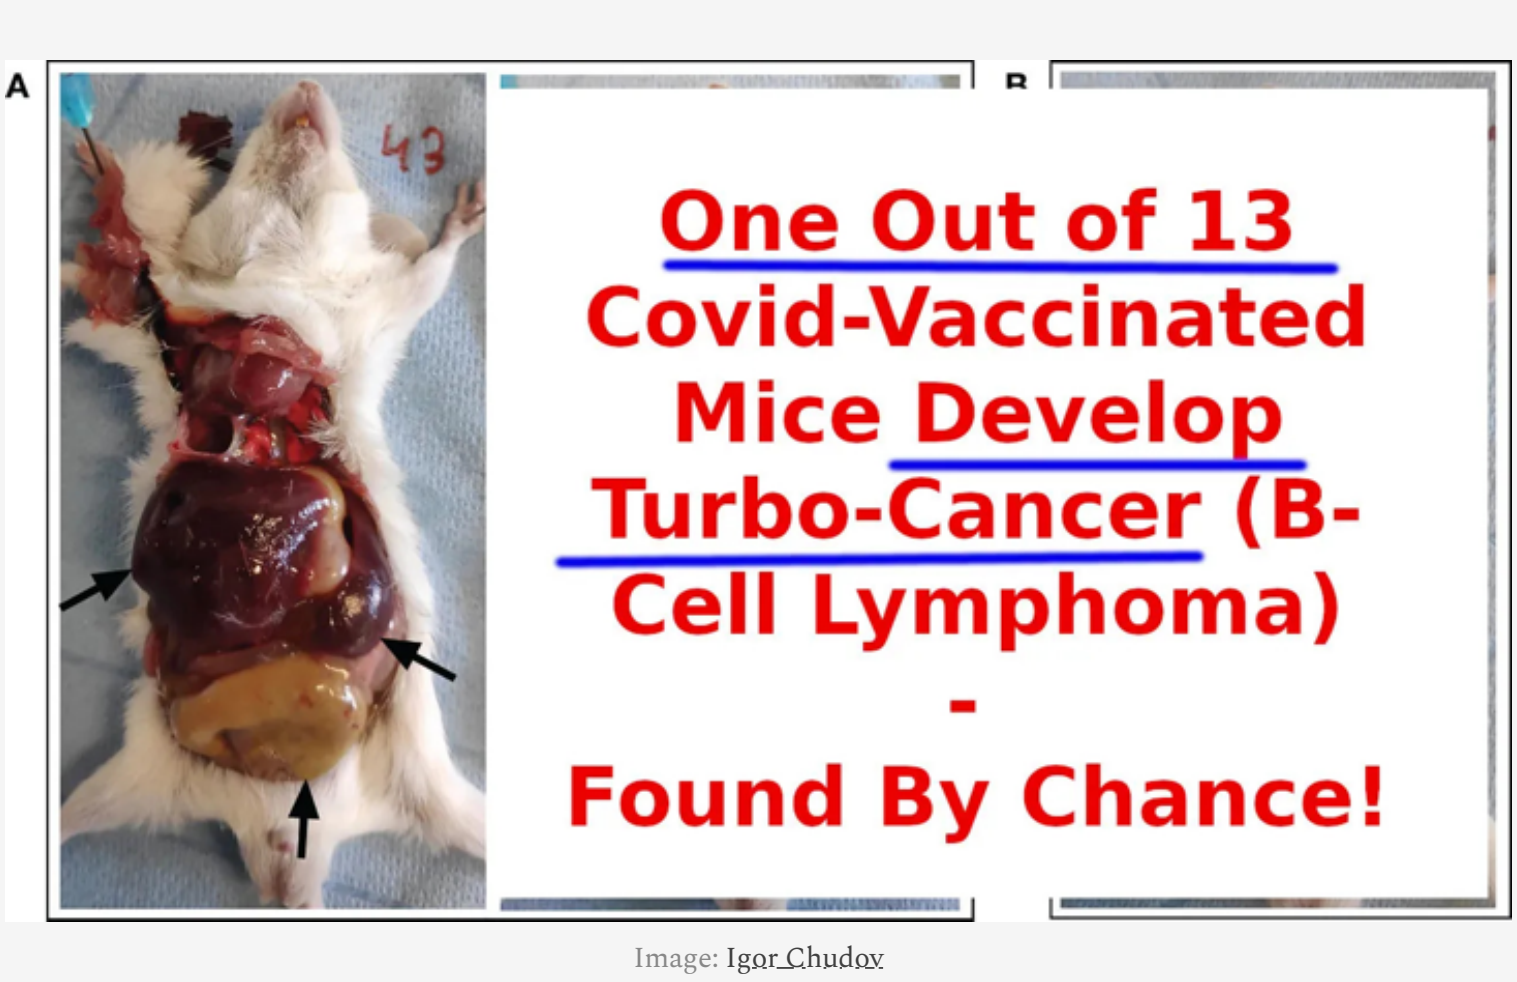
"These cancers are behaving in a very aggressive manner and not responding to therapies in the usual manner," explained Dr. Cole. "And that's because the immune system is dysregulated by these lipid nanoparticle synthetic mRNA shots."

Turbo Cancers Are More Deadly

"The turbo cancers kill faster and [are] more aggressive. Is that right?" asked Greg Hunter.

"They do," answered Dr. Cole. "And it's because the immune system can't turn back on to fight them."

Dr. Cole mentioned a cancer study performed in 13 BALB/c mice. "And in 13 mice, one of them got a horrendously aggressive lymphoid cancer. One out of 13. That's statistically a lot."



A
B
43
One Out of 13 Covid-Vaccinated Mice Develop Turbo-Cancer (B-Cell Lymphoma) - Found By Chance!

Image: Igor Chudov

"We're seeing young people get leukemias, and they appear in the emergency room. **And they're gone within a week**," Dr. Cole added. "We have individuals that had cancer in remission. This is the one that's been very interesting to me. People who've been clear of their cancer [for] 2, 3, 5, 10, even 20 years, I've heard in one case, where after the shots, **their cancer aggressively came back**."

More mRNA Shots on the Way

Dr. Cole explained that the issue of cancer-causing shots isn't limited to COVID injections alone; it pertains to the broader application of this technology involving lipid nanoparticles and synthetically engineered GMO RNA. "**And they want to do this with hundreds of other products now**. It's easy for the manufacturer, but it's not good for humanity."

Yesterday I was watching Owen Shroyer of Infowars interview Ed Dowd who opined "they" were looking for something to distract us from the rising death toll of The Lethal Injections...that interview I think took place September 25..

And -- October 6, out of the blue! Who could have predicted it! The terror attack by Hamas in Israel! It's raised fear of Terrorism to a fever pitch! Netanyahu and thugs are going to burn every last Palestinian in Gaza to a crisp! All the morons who yelled out in "Support of the Science" are now howling for Palestinian blood to be spilled... 😨

You know something? The reality of The Lethal Injections must be unimaginable, if what The Monsters are bringing into play to distract us from them involves "genocide" and "nuclear war"... 🤔

It is very difficult not to agree with you Captain. Not at this point. My thinking was "they didnt kill enough they have to starve us, or nuke us, or something" to get to the numbers left they want in time.

But now? I think eventually all of those with the jabs will die...I just dont know when anymore.

But you are right, it must be unimaginable Not enough of us are dying fast enough.

Mark Oct 14

Yeah, right.

I'm sure that Hamas and Iran (both of which are BRAGGING about how they carried off the attacks) did so in order to keep people from finding out how dangerous the "vaccines" are.

Makes sense to me...../sarc

Mark 19 hrs ago

I agree that the politicians and others would love to divert attention from the whole Covid issue....the origins, the lockdowns, masking, and especially the disastrous vaccines.

I just think that it's silly to think that the attacks on Israel by Hamas were somehow coordinated and ordered by the globalists and/or some shadowy group of western conspirators.

[Mind picture:

Klaus Schwab sitting at the head of a large table in a huge conference room. Sitting around the table are individuals, each with a small sign in front of them denoting their area of responsibility.....such as: North America, South America, Eastern Europe, Western Europe, etc.

Blofeld......sorry, I mean Schwab.....(in a thick German accent) asks the man who heads operations for the Middle East and moslem world,

"Have you contacted Hamas and the Iranians? They know what to do, correct? They must not fail us...we must divert attention from the vaccines."

"If they refuse, we will make them pay"

The man answers, "Yes, they have been instructed on what to do and they have agreed. The Zionist state will be attacked as required."

"We must not allow the population to know about the vaccines. This diversion will help accomplish our goals "

Hello Mark..

That mind picture of yours, is precisely what is happening; or a situation so similar there's no point discussing the differences. Yes, Hamas hates the Israelis. But it is an open secret that Hamas and Hezbollah both, are creations of Mossad. (Ever read "Nineteen Eighty-Four"? If not, high time you did.) I correspond occasionally with Rabbi Chananya Wiesmann in Israel; in one of his broadcast emails he mentions:

"The Gaza border: one of the most fortified and technologically advanced borders in the world, teeming with combat soldiers, battalions of tanks, and a heavy air force presence. There are multiple systems in place there including;

1. Static thermal imaging observation posts.
2. Manned patrol vehicles.
3. Static manned observation posts.
4. Subterranean RADAR.
5. Reconnaissance drones.
6. Reconnaissance aircraft.
7. Autonomous patrol vehicles.
8. Fence motion detection.
9. Bomb proof multi-layered reinforced fence set in concrete."

Kinda like Lahaina.. best alarm systems in the world - didn't sound off.

To change the subject - we need to contact our senators or whoever to #EXITTHE WHO

(I cut&pasted from James Roguski from substack)

Dear Senator,

I want the United States to #ExitTheWHO.

I want you to submit companion legislation in the Senate in support of House Resolution 79, the

World Health Organization Withdrawal Act.

The sponsor of this legislation, Representative Andy Biggs (AZ-05) has already gained the support of 50+ co-sponsors in the House who also support the United States' withdrawal from the World Health Organization.

I want you to simply copy H.R. 79 and submit it as a companion bill in the Senate as soon as possible.

The WHO's amendments and treaty violates our democratic constitution. It MUST BE STOPPED!

Because, will you have the power to stop unjustified counter measures? Can you promise to guarantee there will be no more experiments with substances when nobody knows exactly what is in it? You must guarantee this, after these last three years. Otherwise, step down if you are incapable of dealing with this situation.

Sincerely,

One more American that wants to #ExitTheWHO.

Mark this is how the CIA or any intelligence organization works, they create a Hollywood version of catastrophic events called Psyops to divert all of the public/worlds attention because many people have short attention spans or from the continual chaos are so stressed out they tune out. Most of the wars in other countries are instigated, funded by CIA. I just read something that the U.S. gave money to Hamas and they gave money to Israel. We all know they just gave 6 Billion for hostages that Qatar is involved in also to make certain those funds are released.

THIS is why there is so much craziness going on. The J 6 made up Psyop? All Feds that planned it, dressed in costumes of Trump supporters. Why don't you think we haven't seen the unretouched 40,000 hours of video? Because it implicates all of them. The fake bomb that was placed by the FBI. Gretchen Whitmer's fake kidnapping was schemed up by the same head of FBI hof Detroit that then got a promotion because he did such a good job so off to D.C. he went for January 6.

The deep state is controlling all of it.

No name here Oct 14

OK, I'm disillusioned enough to go along with your premise for shits and giggles... Presuming Dr. Ryan Cole is playing us, is it just him, or are there other forces at work? To what end?

I can see the reason for mandatory vaccination - people were scared, others greedy, far leftists getting off on the power over us toothless, trailer dwelling hicks. But who benefits from convincing people they are carcinogenic? Not the governments that mandated them. Not the doctors. Not the drug companies. Not the military. Not the employers who mandated them.

If he's right, everyone is screwed... And few people want to believe it, anyway, so it would be a long uphill battle to convince people, especially if a few more years go by and the data isn't there.

Can you spell out your hypothesis more concretely? I'm genuinely curious.

LIKE (3) REPLY (2) SHARE

Fabian Spieker Writes Vigilance per VAERSOct 14·*edited Oct 14*

No, Ryan Cole isn't playing us. I think he is pretty convinced of what he is saying and he is saying it for all the right reasons. I think he's a good and honest man from all I can tell.

However good and honest though, he is just a man. People cheering and nodding their heads in agreement are sources of confirmation for him.

When there is no healthy discourse, both correct and false information can become self-amplifying.

This is precisely what you are witnessing. We all want to hear that we were right, that hell has been unleashed on the world, but this desire has caused us to fool ourselves.

I don't know if anyone else is actively playing us (probably), but somehow the wrong narratives are being promoted.

I've been working with the data for many months now and trust me I'm working hard. I dare say there is nobody half as familiar with the US data as I am right now.

Hell has been unleashed. We all know it. Many millions have been killed worldwide.

I am working on summing it up, but it's very tough, because literally every single counter-narrative out there stands in stark contrast to what I am seeing.

The biggest issue with these drugs seems to have been COVID. Call me crazy.

If I started telling you more, you'd just be more certain I'm crazy or we'd end up argueing. Either way I'd probably waste time I better spend on writing at this point. Feel free to look through my notes to get an impression what it's all about.

Everything I see that could prove how many 100k's Americans were killed has been "debunked" by counter-narratives. We are actively working against the truth right now. Almost all of us. Almost all the counter-narratives are wrong.

LIKE (4) REPLY (1) SHARE

I knew one person pretty well who just dropped dead in the past couple of years, at least two more tangentially, and several relatively well that got aggressive cancers. Another relatively young person collapsed from a major stroke.

I hope you're right. It's certainly in my material best interests if you are, so I'm more than willing to accept being wrong.

I'll check out your notes. Thank you for the honest engagement.

LIKE (2) REPLY (1) SHARE

Fabian Spieker Writes Vigilance per VAERSOct 14

I know 4 people with myocarditis (plus a bunch with other newly acquired cardiovascular issues). These are real issues, but they don't explain the large number of excess deaths.

I don't see any safety signal anywhere for cancer. I looked into the ones that were advertised by others and they were all bogus. I strongly doubt this is happening on a grand scale. Doesn't mean there isn't the odd reaction that would promote cancer growth.

<3

LIKE (3) REPLY (2) SHARE

BobbyOct 14

So what are the excess mortality causes of death, or is that data not available? Whatever the causes are, I assume they are a result of the shots.

LIKE (2) REPLY (2) SHARE

Fabian Spieker Writes Vigilance per VAERS13 hrs ago

-COVID / COVID treatments

-COVID exacerbated by shots in late 2021

-Direct side effects of shots, mostly cardiovascular

-Distress and despair related deaths with external causes, particularly in people under 50

-Fear and loneliness exarbating all preexisting conditions. Loneliness is a big mortality factor among elders

-lack of access to medical care due to a bizarre sense of social responsibility, fear of covid, distrust in the medical establishment

I think those are the main mechanisms.

LIKE REPLY SHARE

Peter22 hrs ago

Professor Denis Rancourt has delved as deep as anyone into the excess mortality causes, before the jab and after. He noted 'hot spots' of excess mortality in cities around the world that used aggressive and inappropriate virus protocols, such as ventilators, pathogenic 'end of life' drug cocktails, excess dosing of HCQ, kidney destroying Remdesivir, and later the jab. He found that these toxic protocols, taken together, accounted for ALL excess mortality in the last few years.

Fabian Spieker Writes Vigilance per VAERS13 hrs ago

All? That's just absurd. If he said that, he has obviously not taken an honest look at the details.

He is making some important observations about ACM, but the interpretation seems way off.

LIKE REPLY (1) SHARE

Peter6 hrs ago

He's invited anyone to challenge his interpretations, but so far no takers. As he's retired now, he has no industry bias to worry about, and if you look at any of his interviews, he knows his subject. Re your 'no cancer signals' comment, perhaps the most compelling presentation I've watched is by D-Med whistle blower, Dr Theresa Long, who noted an abrupt, near 300% rise in cancers in the US military in 2021. She compared this year to the previous 5, where figures were near constant (due to the large D-Med database), but dramatically lower.

LIKE REPLY (2) SHARE

Fabian Spieker Writes Vigilance per VAERS4 hrs ago

Regarding the DMED data. It doesn't seem to be very reliable from what I've heard and it isn't public. I've already asked a few people for the dataset...

A 300% increase just seems too high, but I suppose that depends on the baseline.

LIKE REPLY SHARE

Fabian Spieker Writes Vigilance per VAERS6 hrs ago

I went back to the data to take another look at cancer and distance myself from my claims.

While I don't find a positive correlation with vaccinations, there definitely is a very strong signal.

Apologies!

LIKE REPLY (1) SHARE

Peter3 hrs ago

Turning the argument on it's head re cancer/jabs, I would be surprised if there were no downstream cancer implications of the jab, considering all the new immune suppressing technology crammed into these novel injections, like the 'silencing' of toll-like receptors, for example.

I was intrigued by some of professor Rancourt's further research into other 'viral pandemics' in the last century, where he concluded that there was no excess mortality that could be pinned on any 'virus', up to and including the 1918 'Spanish Flu', which he argues was mainly bacterial pneumonia.

Perhaps the observations of writer, Eleanora McBean, at the time, shed some light on what was going on: - 'Strong men, hale and hearty, one day would be dead the next. The disease had the characteristics of the Black Death, added to typhus, diphtheria, pneumonia, smallpox, paralysis and all the diseases people had been vaccinated with immediately following

Expand full comment

Fabian Spieker Writes Vigilance per VAERS
3 hrs ago

It would surprise me if the jabs had a positive impact on cancer progression, too, but we need evidence.

Regarding pandemics. Of course shitty treatment exacerbates any infection. The astronomical doses of Aspirin (up to an ounce a day) surely didn't help.

Everything we did exacerbated covid. Literally every single "measure" they took. There's still a pathogen that can kill people. The whole discussion is ridiculous the way I see it. It only serves to discredit us.

Fabian Spieker Writes Vigilance per VAERS8 hrs ago

I have to apologize.

https://substack.com/profile/45049691-fabian-spieker/note/c-41883285

However when I said "there is no signal", I meant that all regressions across states result in negative correlations between doses per capita and cancer excess mortality, which doesn't mean the vaccines are not to blame.

The timing is very striking.

Again, apologies.

LIKE REPLY SHARE

Fabian Spieker Writes Vigilance per VAERSOct 14·*edited Oct 14*

The other big issue are suicides and accidents. External cause excess mortality was soaring and no decision maker is even being criticized for this.

We should be working on getting justice for the many poor souls who have ended their own lives, either intentionally or accidentally. Yet everybody is talking about cardiac issues, a "sudden death epidemic" or "turbo cancer".

Cardiac issues are the one thing that is real among all the counter-narratives, but they only make up a small proportion of the deaths that were inflicted, especially in young people.

It isn't reasonable for these issues to receive so much focus.

Whoever took this shit should be learning from their mistakes instead of blaming others. People gave their children a dangerous drug and their children died.

We are talking about a few hundred deaths in 12-17 year olds, while thousands who stood strong were agitated against until they drowned in their own despair. Yet the fucking morons who gave their kids an experimental drug receive all the attention. We are not pursuing justice this way.

If there is cancer, we will see the signal soon enough. We need to focus on the million deaths that have already happened.

Hardly anyone is even aware how all these children died throughout the past years. Sudden death epidemic my ass. It was an epidemic of cruel and inhumane policies (and infection enhancement in older people).

Contact Report 816

Quetzal:

This is also proven in the case of the Corona epidemic, which is 'fought' with means, lies and empty promises that cause many deaths.

Also the number of deaths due to the Corona virus is set so much lower than what corresponds to the truth as a result of lies.

Our records 6 days ago are known to me in this respect, and they amount to 8,314,088 Earth-humans who have died of the Corona virus, very many of whom have succumbed to death as a result of unsuitable vaccines.

Also, it should be mentioned, our research has shown that various of the Corona vaccines attack the DNA and also cause various types of cancer, as well as damage the nervous system and impair and damage the brain in its functions.

Yep! And they have at least 6 more venom based “medications” in the works to bring to market.

Now we know why they’ve pushed people to quit smoking. Tobacco is the antidote

Pirate Studebaker16 hrs ago

Yes. Nicotine is the antidote for several things that are very harmful. Like fluoride. Nicotine blocks fluoride from crossing the blood brain barrier. As it blocks snake venoms and the spike proteins in the injections. There are even more things nicotine blocks. Doctors are prescribing nicotine patches to people with "long covid".

I remember a study about smoking and cancer and an accidental discovery was made about nicotine blocking fluoride. Then the people who conducted the study realized the anti-smoking campaign began in the same years as wide-spread fluoridation of municipal drinking water. This was also when American tobacco companies began adding hundreds of chemicals to the tobacco in cigarettes which caused a huge spike in cancer among smokers. So...it was likely not tobacco in moderation that causes cancer, but the added chemicals which caused cancer and deterred people from using tobacco.

Incredible. We need to learn everything we can while we still can. So very much has been manipulated and hidden.

Jesus told us one of the signs of the end times is that knowledge would increase. And that people will perish for lack of knowledge. Just amazing.

One of the ingredients big tobacco added was formaldehyde.. a KNOWN carcinogen! That, and the SV40 virus found in the kidney cells of the monkey’s they used for the polio “vaccine” which cause soft tissue cancers. Bone marrow, lymphoma, brain and LUNG cancers. They needed something to cover that up. Tobacco was the perfect target. It’s all been a coverup.

There have been many studies on nicotine. Doctors started noticing that those with Alzheimer’s were at a higher level in non smokers than it was in those that smoked. Study found the nicotine protected the brain. We now know why. We have nicotine receptors in the brain, digestive track and in the ovary’s and testicles. It seems Alzheimer’s probably has a venom connection, as they’ve been putting venoms in medications too.

Another thing Doctors noticed is the people that filled up the hospitals the most were no smokers. But the liars, like Fauci, told everyone smokers were are I higher risk. Which was a lie!

If you know who Dr Ardis is, then you may know he had Roundup and Roundup+ tested for venoms. BINGO!! Tons of different type of venoms in what they call “glyphosate”! Now we know why glyphosate causes gut problems, when you know there are nicotine receptors in the intestinal track. It’s not ‘gluten’ that people are having problems with, it’s the glyphosate (venoms!) they use to dry the wheat out faster with! And just think if the millions of tone’s of that toxic crap being spared on crops around the world for DECADES! Which I believe brings us back to Alzheimer’s, and dementia, and why there’s so much more of it these days too.

Thank you for this information, Therisa. I appreciate it so much. They also have "Round-Up Ready" crops that are genetically spliced with glyphosate so they don't even have to spray it anymore. Then we eat it. Feed it to babies.

That makes so much sense about "gluten intolerance". I kept saying to people - no way - people have been eating gluten for thousands and thousands of years and have been fine. It also makes sense about brain malfunctions of all kinds. I vaguely knew about synthetic venoms in medications and that's a big reason there's a snake in the symbol for "doctor", but now I know a lot more. Like a common heart med called Lisinopril made from the most paralytic viper venom known to man that has deadly side effects and yet they prescribe it like candy. It causes kidney failure and not one doctor who prescribes it tells a patient. The patient just develops kidney disease followed by failure and Oops! Another one bites the dust. But since the patient didn't die of the heart disease the medication was prescribed for - it's a success!

What have we allowed this world to become? I know. I didn't know any better than any one else what these evil idiots were up to, but there is a part of me that did know they were never to be trusted. But the whole world kept telling me to buck up and just get along. I saw too much and I couldn't do it. Now I'm grateful I can see. I only hope more eyes are opened.

Here is a copy and paste of the email I got on venoms in roundup by Dr Ardis, from Jonathan Otto.

ROUNDUP

I received an email from Jonathan Otto.

In that email Dr Ardis exposes Round up and the venom’s that are in it!

“Dr. Bryan Ardis revealed that his unvaxxed wife, Jayne, just tested positive for scorpion and snail venoms...

And he traces their origins to the poisons in our food supply!

“When scorpion venom populated in her body, I then knew Monsanto and their use of insecticides that are made from scorpion venoms, maybe it's found in Roundup or in glyphosate.

Dr. Ardis then purchased and tested Roundup and Roundup Plus (the more concentrated version)... And confirmed his worst fears:

“So just so you know, this is what we're up against. They have been utilizing glyphosate, which actually has every published side effect identical to snake venom in the human body. It does three things. Established in 2003, glyphosate, the worldwide most used herbicide, insecticide, sprayed on all your food you're eating. It mimics the same action of all venoms with these three minerals.”

I couldn’t believe my ears when Dr. Ardis revealed the sheer number of

Is it possible that the unvaccinated are also subject to turbo cancers if the spike protein is transmitted from the vaxed? This seems to be happening.

Nope.. not like the vaXx’d. But, in case, take bob mills baking soda. It raises your pH & cancer can’t live in a high alkaline body... ✌️

LIKE (9) REPLY (3) SHARE

V L N Oct 13

And eliminate sugar from your diet!

LIKE (8) REPLY SHARE

Pirate Studebaker Oct 13

You can't really change the pH of your body in any dramatic way unless you remove all acids and ingest large amounts of alkaline foods/liquids and then it will have very bad effect on your body. The healthy pH for the body is a neutral 7.35-7.45. Anything off these marks is dangerous and your body has many ways to put itself back into balance if the measures you take to change your pH are slight. Don't buy the hype of alkaline water, etc. Water is neutral pH.

Coolguy 007 Writes Kresimir’s NewsletterOct 13

Baking soda - even - Bob Mills - will cause your blood and urine to become acidic, it will lower pH. Human body is an amazing apparatus and in most cases does the opposite of what one expects.

Great information

I hope that this information gets out to the main stream public as much as possible

I also hope that there is someway to reverse the effects of the mRNA technology and tired of people. I hope that someone is working on that.

This mRNA technology created by Dr. Robert Malone, and used as a bioweapon against people to for means of deep population control is absolutely evil

Contact Report 852

Billy:

The majority of the world's rulers only have an overly big mouth and only utter stupid and primitive slogans that have neither hand nor foot, but only worthlessness, so that a valuable and lasting peace cannot really and finally be ensured and exist.

Also that there are some 18.5 million human beings worldwide who have been outright murdered by these false vaccinations, as Ptaah explained to me, which of course is vehemently denied, because the truth is not meant to be known.

This, just as it should also not be known how many thousands of human beings suffer from vaccine damage for the rest of their lives.

But what I have to say is that all those in power ...

We need to Exit The WHO - this needs everyone’s attention as horrific all these events unfolding in front of our eyes!!

(Cut&pasted from James Roguski

substack. Which he has all senators information on his substack) -

Dear Senator,

I want the United States to #ExitTheWHO.

I want you to submit companion legislation in the Senate in support of House Resolution 79, the

World Health Organization Withdrawal Act.

The sponsor of this legislation, Representative Andy Biggs (AZ-05) has already gained the support of 50+ co-sponsors in the House who also support the United States’ withdrawal from the World Health Organization.

I want you to simply copy H.R. 79 and submit it as a companion bill in the Senate as soon as possible.

The WHO’s amendments and treaty violates our democratic constitution. It MUST BE STOPPED!

Because, will you have the power to stop unjustified counter measures? Can you promise to guarantee there will be no more experiments with substances when nobody knows exactly what is in it? You must guarantee this, after these last three years. Otherwise, step down if you are incapable of dealing with this situation.

Sincerely,

One more American that wants to #ExitTheWHO.

Pete Wright Oct 14

Dr Cole summed it up perfectly in a clear and concise way. Unfortunately the message isn't getting out to the masses who - even if they refuse any further Covid boosters - will soon "forget" and line up for mRNA flu shots next time round. Even more worrying is if the vaccinations on the children's schedule become mRNA/LNP versions too, which I think they will. The only thing that MIGHT stop the madness is if the problems with the current C19 shots become too serious and too numerous that they can no longer be ignored
